

RESEARCH WRITING AND CASE DEVELOPMENT TRAINING PROGRAM

(AICTE AND MEPSC APPROVED TRAINING PROGRAM)

10th July 2026 (Friday) - 19th July 2026 (Sunday)

Online Mode | Evening Time- 3 hours daily (30 hours)

INTRODUCTION

The main objective of the research writing and case development program is to help the participants in developing quality research papers and cases. It will develop necessary technical and research skills in the students and research scholars. This training program will also help the students and scholars in developing quality-oriented real-world cases. The program will be taught in both offline and online mode. It depends on the availability of the resource people and choice of the college and university. This program will help many early-stage researchers in effective research paper writing and participants will be able to ensure the entire process from identifying research questions to developing papers.

OBJECTIVES

- To ensure all the participants will get the knowledge of developing research papers and case studies
- To introduce the students with methodologies to convert secondary data and reports into research papers
- To train participants in structuring and developing better quality case studies which meet academic standards and reputation
- To familiarize students with modern tools, methodologies for data analysis and effective writing
- To equip students and scholars with the overall process and timeline of publication in quality peer-reviewed and indexed journals

THE TRAINING PROGRAM INCLUDES HANDS-ON WORKSHOPS, LECTURES, SOFTWARE TOOLS, GROUP DISCUSSIONS AND PRACTICAL EXERCISES.

INTRODUCTION TO RESEARCH WRITING

- Key components and introduction to research writing (Lecture & discussion)
- Understanding different types of research papers (Activity)
- How to do literature review and critical analysis (Lecture)
- Critical reading and annotation of sample literature

ADVANCED LITERATURE REVIEW & AI TECHNIQUES

- Literature review using AI tools (Lecture & demo)
- Hands-on: Using tools like ChatGPT, Semantic Scholar, Elicit, etc.
- Ethical usage of AI in research writing (Interactive discussion)
- Group activity: Conduct mini literature review using AI tools

CASE STUDIES & THEORETICAL APPLICATIONS

- What is a case study? How to develop one (Lecture + example)
- Theoretical frameworks in case study development (Activity + discussion)
- Hands-on: Drafting the outline of a case study (Workshop)

DATA ANALYSIS & INTERPRETATION

- Types of data and data collection methods (Lecture)
- Basics of qualitative and quantitative data analysis (Activity)
- Hands-on workshop: Interpreting sample datasets and writing findings

RESEARCH ETHICS & PUBLISHING

- Plagiarism and ethics in research writing (Lecture & case studies)
- Identify writing for conferences vs. journals (Activity + discussion)
- Tools to check plagiarism and proper referencing (Hands-on)
- Group discussion: Common ethical dilemmas in research

PRACTICAL WRITING WORKSHOPS

- Structure of a research paper (Lecture + analysis of samples)
- Practical writing workshop: Write intro + literature review sections
- Peer review & feedback session

FINAL ASSESSMENT & CERTIFICATION

- Final writing task (Mini research report or case study with AI use)
- Presentation of key learning takeaways (Group activity)
- Review and individual feedback on writing submissions
- Certification & wrap-up ceremony

OUTCOMES

After the successful completion of the training program, the faculty members will:

UNDERSTAND THE FUNDAMENTALS OF RESEARCH WRITING

- Identify the key components and structure of academic research papers.
- Differentiate between various types of research outputs (e.g., articles, case studies, conference papers).

CONDUCT EFFECTIVE LITERATURE REVIEWS

- Perform structured literature searches using academic databases.
- Critically analyze and synthesize academic sources.
- Utilize artificial intelligence tools to streamline literature review processes.

DEVELOP RESEARCH CASE STUDIES

- Understand the methodology and purpose behind case study development.
- Apply relevant theoretical frameworks to real-world or hypothetical cases.

ANALYZE AND INTERPRET DATA FOR RESEARCH

- Perform basic qualitative and quantitative data analysis.
- Translate raw data into meaningful interpretations suitable for academic writing.

APPLY RESEARCH ETHICS AND ACADEMIC INTEGRITY

- Recognize common forms of plagiarism and apply strategies to avoid them.
- Follow ethical standards in writing, especially when using AI tools.

DIFFERENTIATE BETWEEN PUBLISHING PLATFORMS

- Identify the differences in writing style and submission process for journals vs. conferences.
- Select appropriate publication venues based on research scope and audience.

PRACTICE HANDS-ON ACADEMIC WRITING

- Draft core sections of a research paper (e.g., introduction, literature review, methodology).
- Receive and apply peer and instructor feedback to improve drafts.

USE AI ETHICALLY IN ACADEMIC WORK

- Leverage AI for idea generation, summarization, and outlining.
- Understand and apply ethical guidelines for AI-assisted writing.

DEVELOP PRESENTATION AND COLLABORATION SKILLS

- Present research ideas and findings clearly in both written and oral formats.
- Collaborate effectively in group activities and peer reviews.

REGISTRATION LINK: CONFAB 360 DEGREE & AICTE CERTIFICATION

<https://bit.ly/4edzf7X>

REGISTRATION LINK: CONFAB 360 DEGREE & MEPSC CERTIFICATION

<https://bit.ly/4tkVVrT>

COMMERCIALS

INR 12980/- (INR 3540/- + INR 9440/-)

- **Beneficiary Name** - CONFAB 360 DEGREE
- **Beneficiary Bank Name** - ICICI BANK, Mayapuri, Delhi, India
- **Beneficiary (Unique) Account No.** - 181805001263
- **Type of Account** - Current Account
- **Branch** - Mayapuri, Delhi, India
- **Payment via ICICI Bank** - IFSC: ICIC0001818

EARNING DOUBLE CERTIFICATION

One from Confab 360 Degree and AICTE | One from MEPSC (After Successful Assessment)
